The luminaire series SUPROS, consisting of two downlights, one surface mounted downlight, a three-phase spot and a pendant luminaire, is truly impressive thanks to its variety of possible applications, excellent LED technology, and harmonious design. The SUPROS product line is ideally suited for the replacement of conventional, high output lighting systems. The system comes with broad beaming reflectors that can be easily replaced with separately available narrow beam angle reflectors, without need of tools. Factory outfitted with LED drivers, all luminaires in the series can be directly connected to 230V electrical mains.
